

Transform your video library into intelligent, Agile Media.

CUBE 365 is a new way to leverage the most potent medium of communication: video. Unlike conventional video editing tools, CUBE365 offers instant visibility and insights deep into your video content—and library. Every word in every video is indexed and ready to search, and artificial intelligence is applied to find compelling passages within long-form video. Built-in team collaboration features add ‘wisdom of the crowd’ to CUBE365's intelligent video technology.

Importing your YouTube® videos into CUBE365 is quick and easy. Same for adding collaborators—at no additional cost—to help transform your video content into *Agile Media*.

Discover the hidden value of your videos by making them easy to:

Search

Easily find ‘snackable’ clips within your videos — and search for existing clips across your entire video library.

Clip

Create compelling clips by highlighting a passage on a transcript — no expensive, complicated video editing tools required.

Share

Automatically-generated ClipPages (a webpage for each clip) and ClipFiles (in MP4 format) are ready to share with a click of a button.

PRODUCT HIGHLIGHTS

Automated, synchronized video transcripts

Full transcripts of videos, auto-generated in minutes and synced to a fraction of a second to your video

Automated 'Hints

Automated suggestions on the most compelling segments of the full video

Simple, transcript-based Clip Creation

Simply highlight a passage in the synchronized text to create a 'snackable' clip of a full-length video

Auto-generated ClipFile (MP4s)

Cloud-based, automated creation and storage of MP4s for every clip

Auto-generated, branded ClipPage™

Instantly generates a custom-branded, public web page for every clip created

Simple sharing on any social network

One-Click Sharing automatically copies clip title, tags, etc--and downloads the MP4 clip file

Auto-translation of Clips to virtually any language

Translate clips (of any duration) from HQ (human-generated) transcripts into over 100 languages

One-click upgrade to near-perfect transcripts

Human-generated (98+% accurate) automatically ordered and integrated--typically within a day
