

Experience It Free at www.densify.com/try

Cloud applications that run on suboptimal resources can cause serious business risks and massive unnecessary spend.

Densify is an **advanced hybrid cloud and container resource management** platform, leveraging machine learning to make workloads self-aware of their precise resource requirements and fully automate the resource management process.

With Densify, you get the best of both worlds: ***Your cloud spend is under control and your apps perform and scale better*** as they get precisely matched across AWS, Azure, Google Cloud, Kubernetes, and VMware environments.

CLOUD
ENGINEERS

Automated resource management at scale, with unparalleled elasticity at the lowest cost.

CONTAINER
PLATFORM
OWNERS

Improved efficiency and reduced risk by determining best container sizes and node resources.

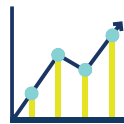

IT FINANCE

Full financial visibility and cost intelligence for reporting and chargebacks.

Why Organizations Use Densify

Densify delivers **automation and operational excellence** in cloud management, **enhancing application performance** with **financially prudent cloud spend**.

Better app
performance & stability

Fully-automated cloud
resource selection & usage

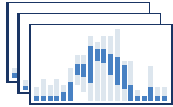

Financially-prudent
cloud spend

Operational efficiency as you
select, deploy, & leverage
cloud for your apps

How Densify Works

Establishes Machine-Learned App Demand Patterns
Business cycles, peaks and valleys, and time-of-day patterns

Builds Normalized Models of Cloud Supply
Ingests the entire cloud catalog and latest technologies

Considers Numerous Factors
Performance benchmarks, cost, technical rules, tags, and policies

Cloe

Cloud Learning Optimization Engine

Dynamically matches the correct cloud and container resources to your apps' demands

Automated Cloud Resource Management

Automated Container Resource Management

Optimization as Code

Cloud Cost Intelligence Reports

slack
Out-of-the-box integration within your normal workflow environment

Award-Winning Cloud Optimization Technology

Densify Named a *Leader* in The Forrester Wave™: Cloud Cost Monitoring And Optimization

"Densify targets the root cause of cloud challenges by addressing the problem at the infrastructure level"

"Densify...goes beyond simple bill reading capabilities by adding in-depth analytics and machine learning, backed up by an extensive understanding of the leading public cloud products."

"Densify leverages machine learning to continuously match application workloads with hybrid cloud infrastructure"
