

AWS re:Invent

NOV. 28 – DEC. 2, 2022 | LAS VEGAS, NV

Cloud-based production for The Lord of the Rings: The Rings of Power

Katrina King

Global Strategy Leader – Content Production
AWS

Ron Ames

Producer
The Lord of the Rings: The Rings of Power

Weyron Henriques

SVP Product Development
Company 3

Agenda

- Overview of AWS for content production
- Content production: A holistic strategy
- Technical deep dive
- The Lord of the Rings: The Rings of Power
- Company 3 and The Lord of the Rings: The Rings of Power

Solution areas

The most purpose-built capabilities and partner solutions for reinventing content production, media supply chain, broadcast, direct-to-consumer and streaming, and analytics

Content production

Media supply chain and archive

Broadcast

Direct-to-consumer
and streaming

Data science and
analytics for media

Content production: Trends

Distributed production

Global orchestration

Operational efficiencies

Content production: AWS adoption benefits

Most functionality

Fastest pace
of innovation

Most proven
operational expertise

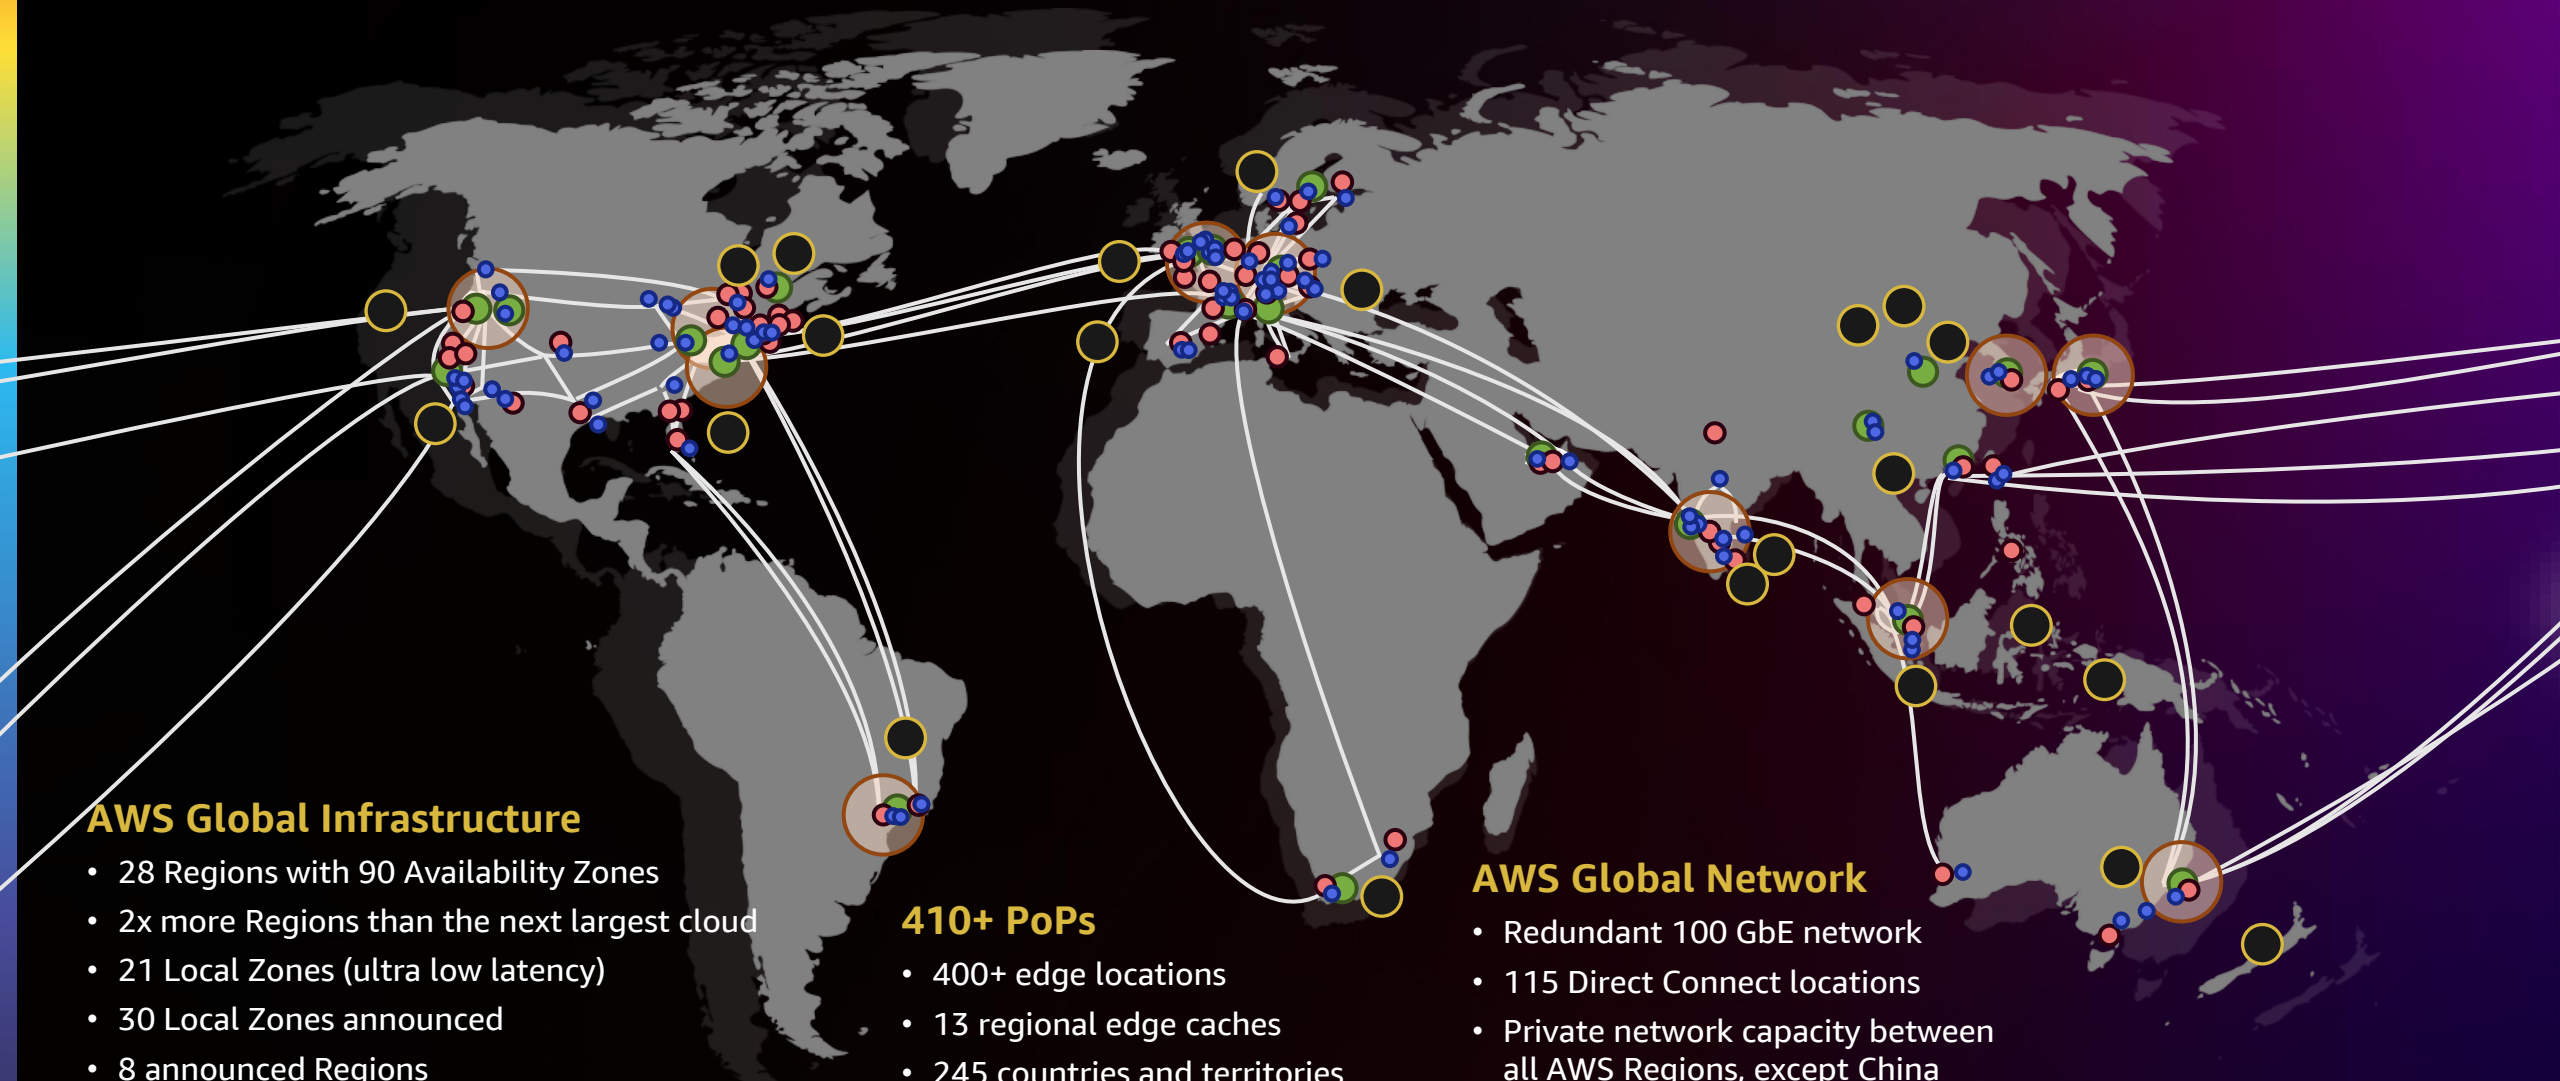

Most
secure

Largest community of
customers and partners

Access to the global talent pool

AWS Global Infrastructure

- 28 Regions with 90 Availability Zones
- 2x more Regions than the next largest cloud
- 21 Local Zones (ultra low latency)
- 30 Local Zones announced
- 8 announced Regions

410+ PoPs

- 400+ edge locations
- 13 regional edge caches
- 245 countries and territories

AWS Global Network

- Redundant 100 GbE network
- 115 Direct Connect locations
- Private network capacity between all AWS Regions, except China

Content production on AWS: A holistic vision

The backbone of a holistic workflow

Studio content lake

- Purpose-built AWS and partner storage solutions from ingest to archive

Orchestration layer

- Applications and SaaS solutions come to the content, assets remain secure

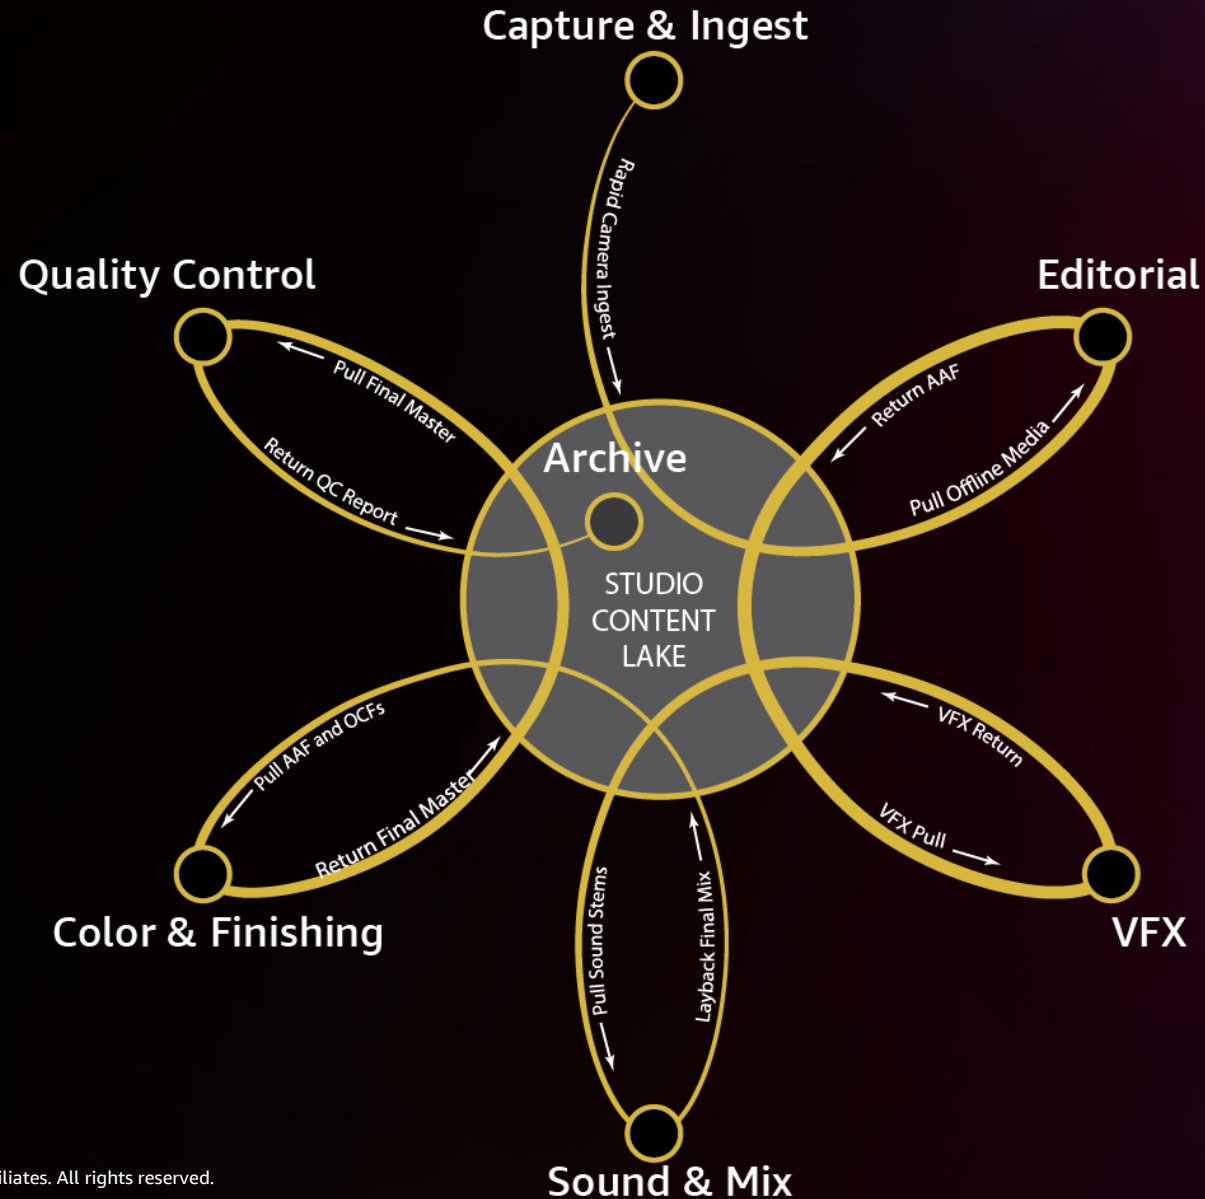

Best practices

- Reduce data silos, improve interoperability, agnostic interconnectivity, API-driven architecture

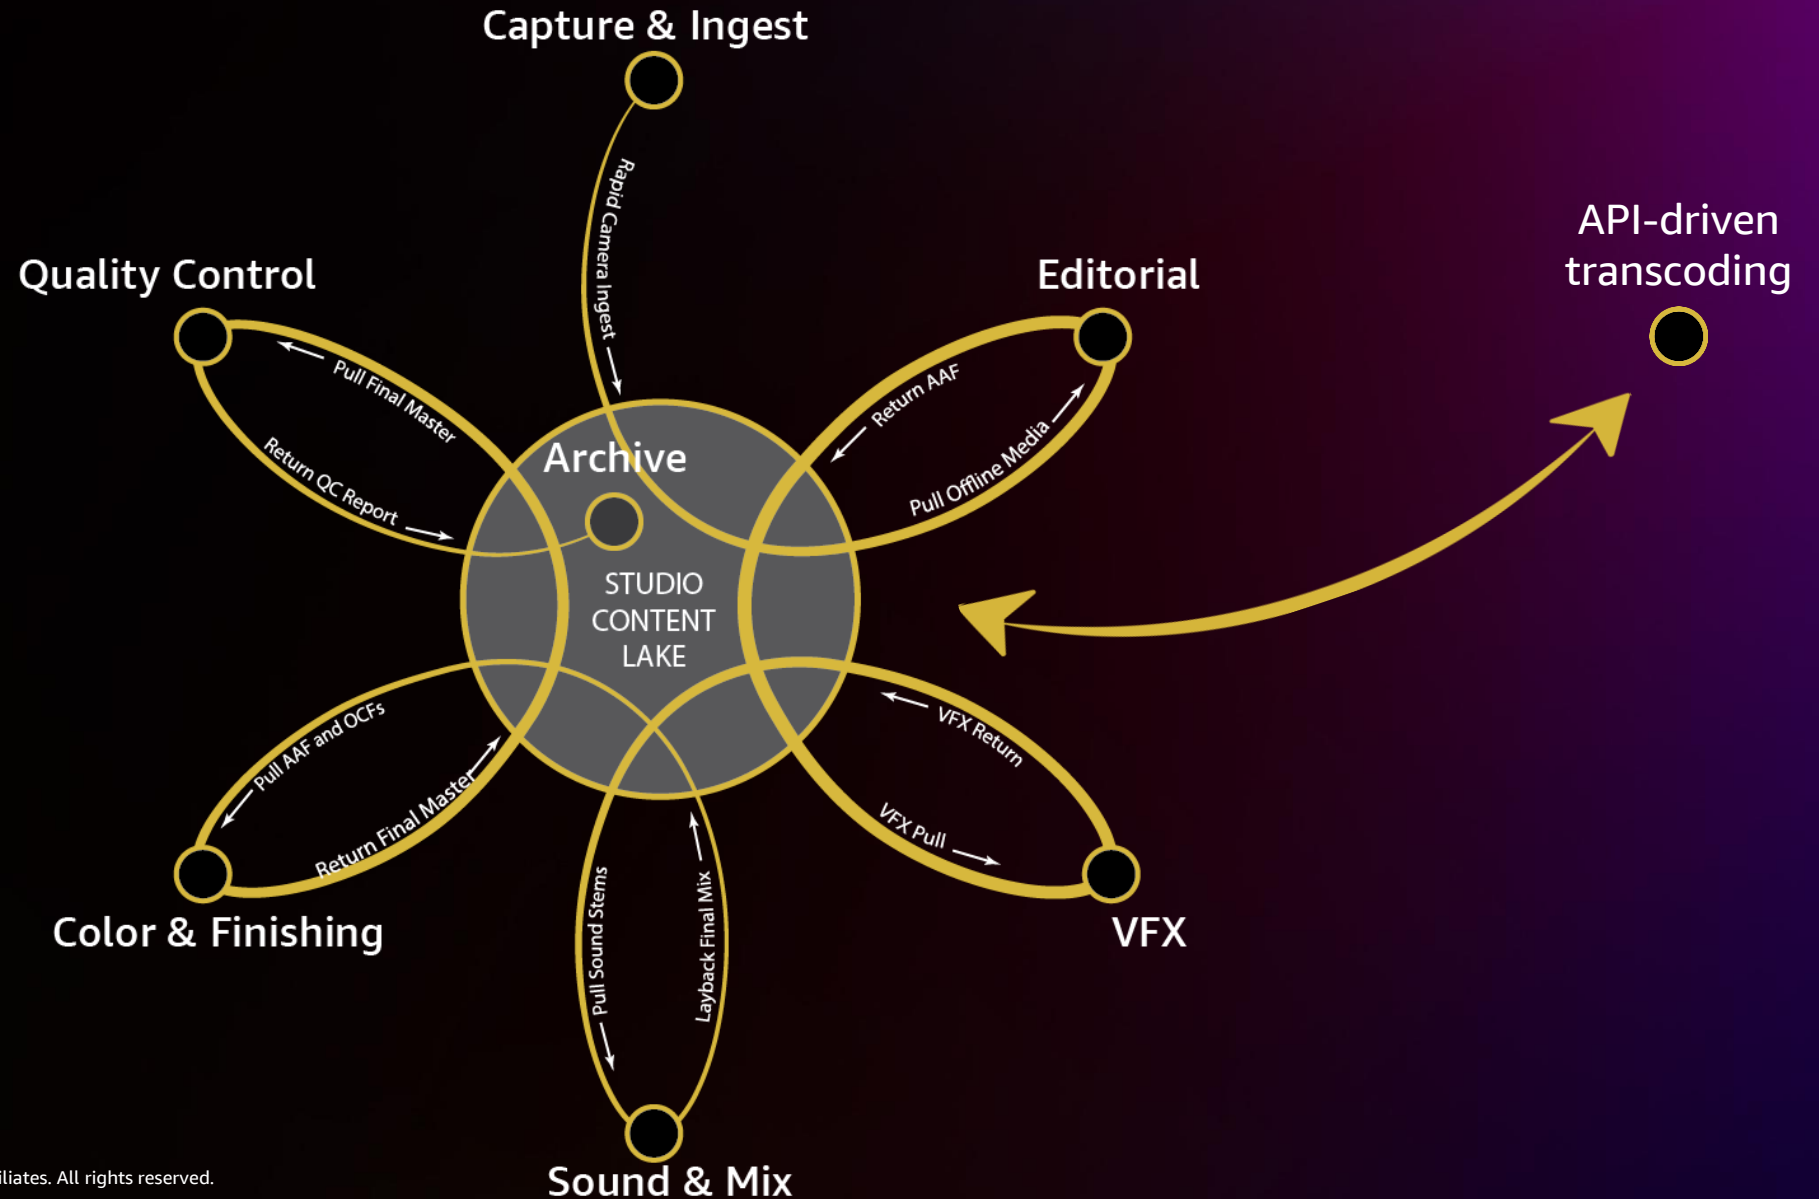

Holistic postproduction in the AWS Cloud

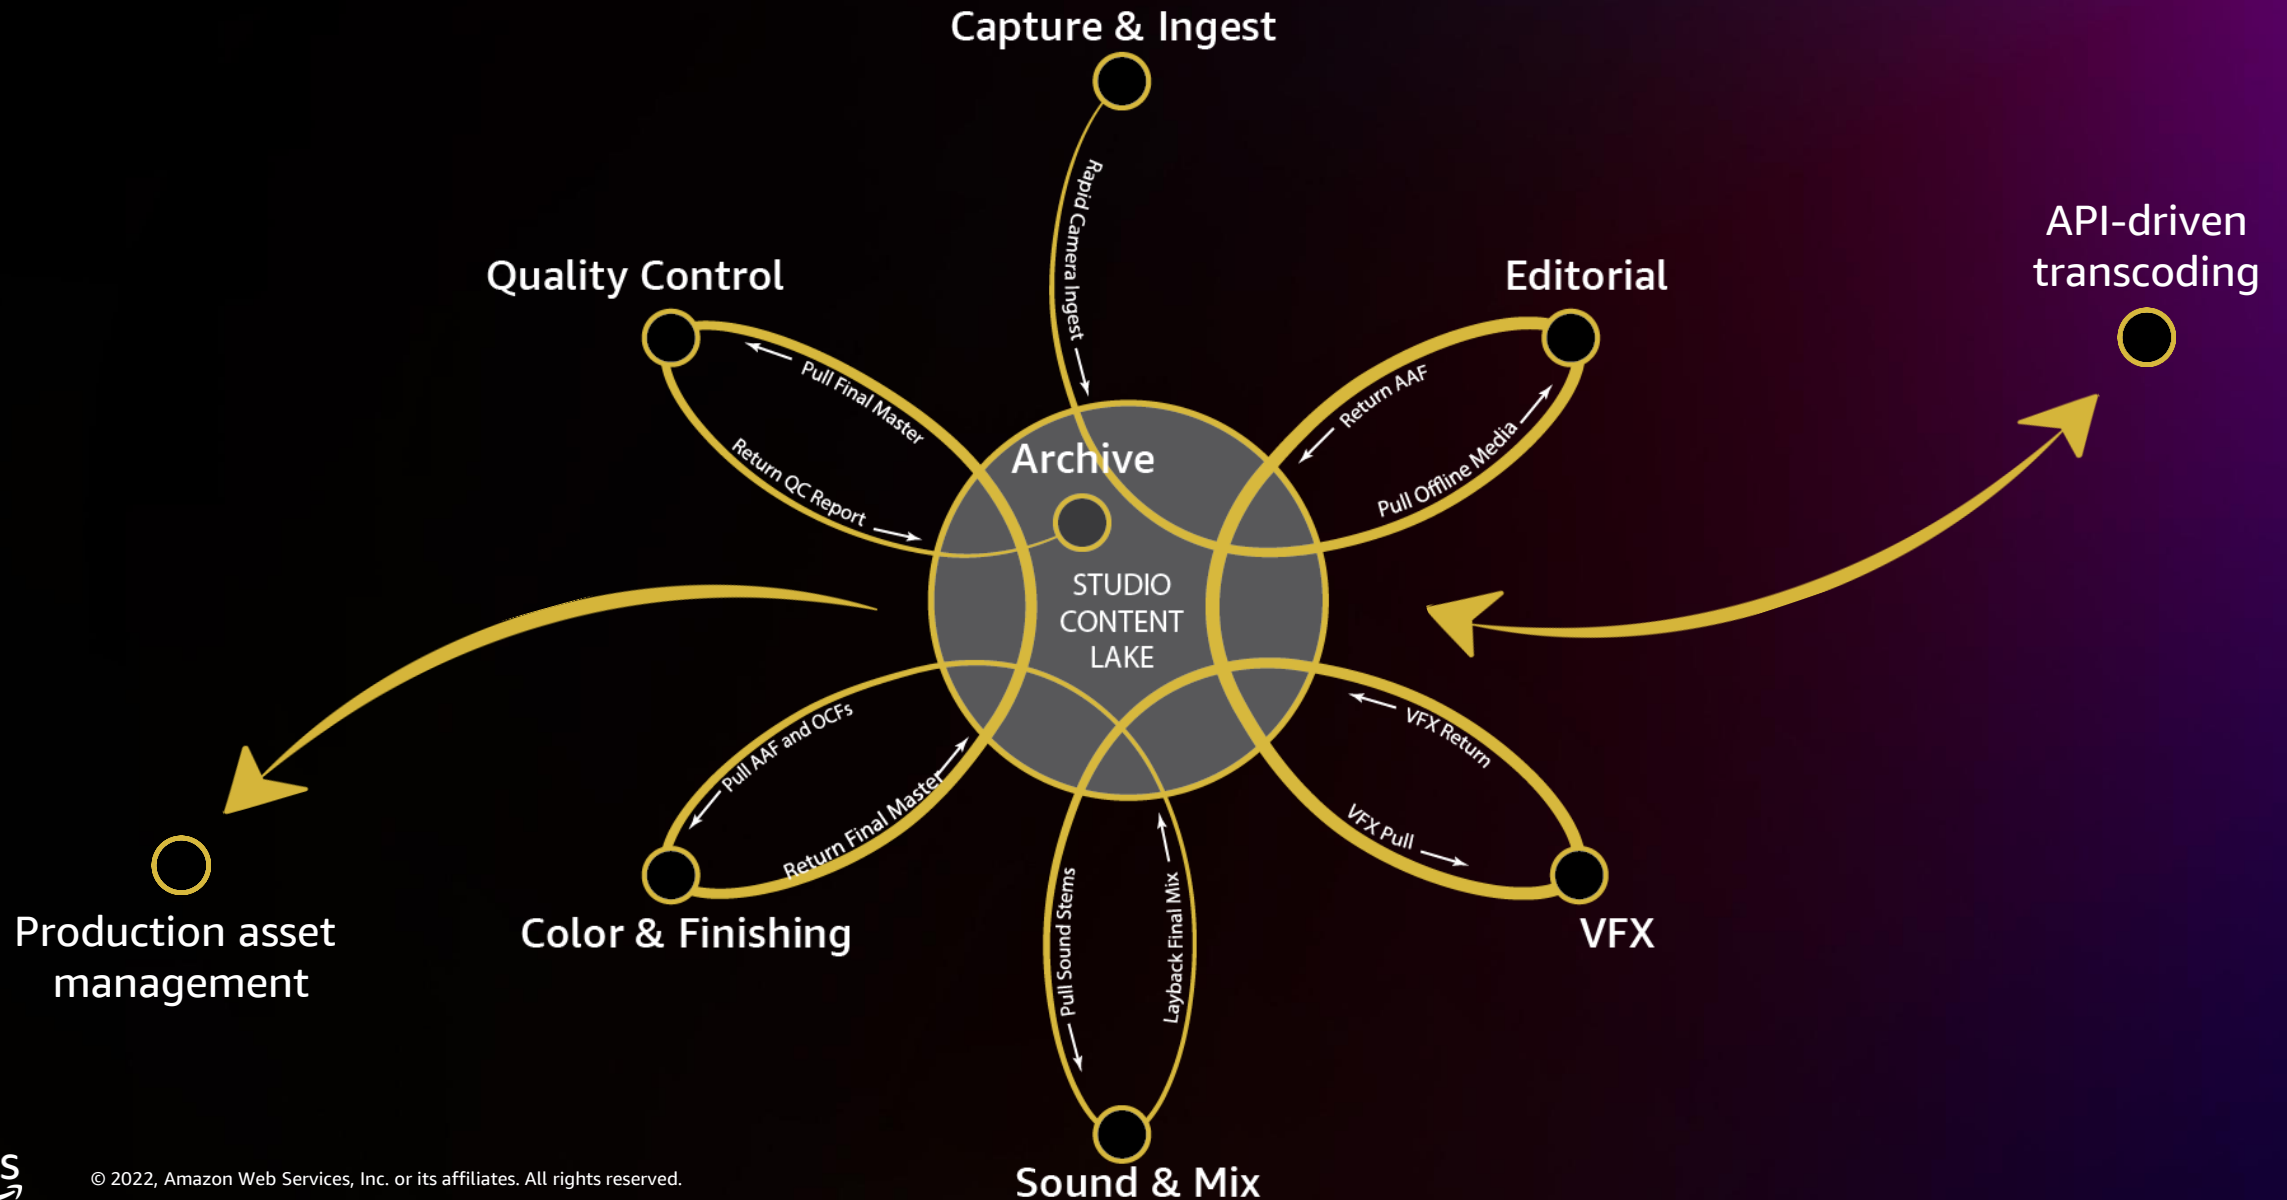

Holistic postproduction in the AWS Cloud

AWS and the MovieLabs 2030 Vision

This “Studio in the Cloud” at IBC 2022 is a demonstration of the MovieLabs 2030 Vision for the Future of Media Creation; MovieLabs has recognized this case study demonstrates the following 2030 Vision Principles

All assets are created or ingested straight into the cloud and do not need to be moved

Applications come to the media

Propagation and distribution of assets is a “publish” function

Every individual on a project is identified and verified and their access permissions efficiently and consistently managed

Workflows are designed around real-time iteration and feedback

Over-the-shoulder view

VIDEO SIGNAL OUT

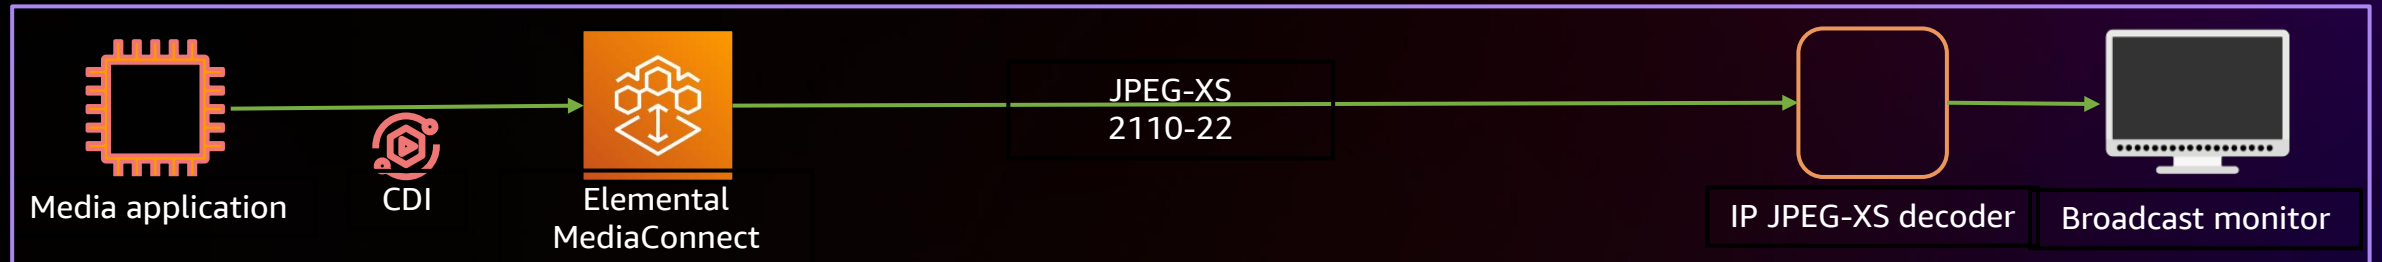

Application encoding

3rd-party encode/decode

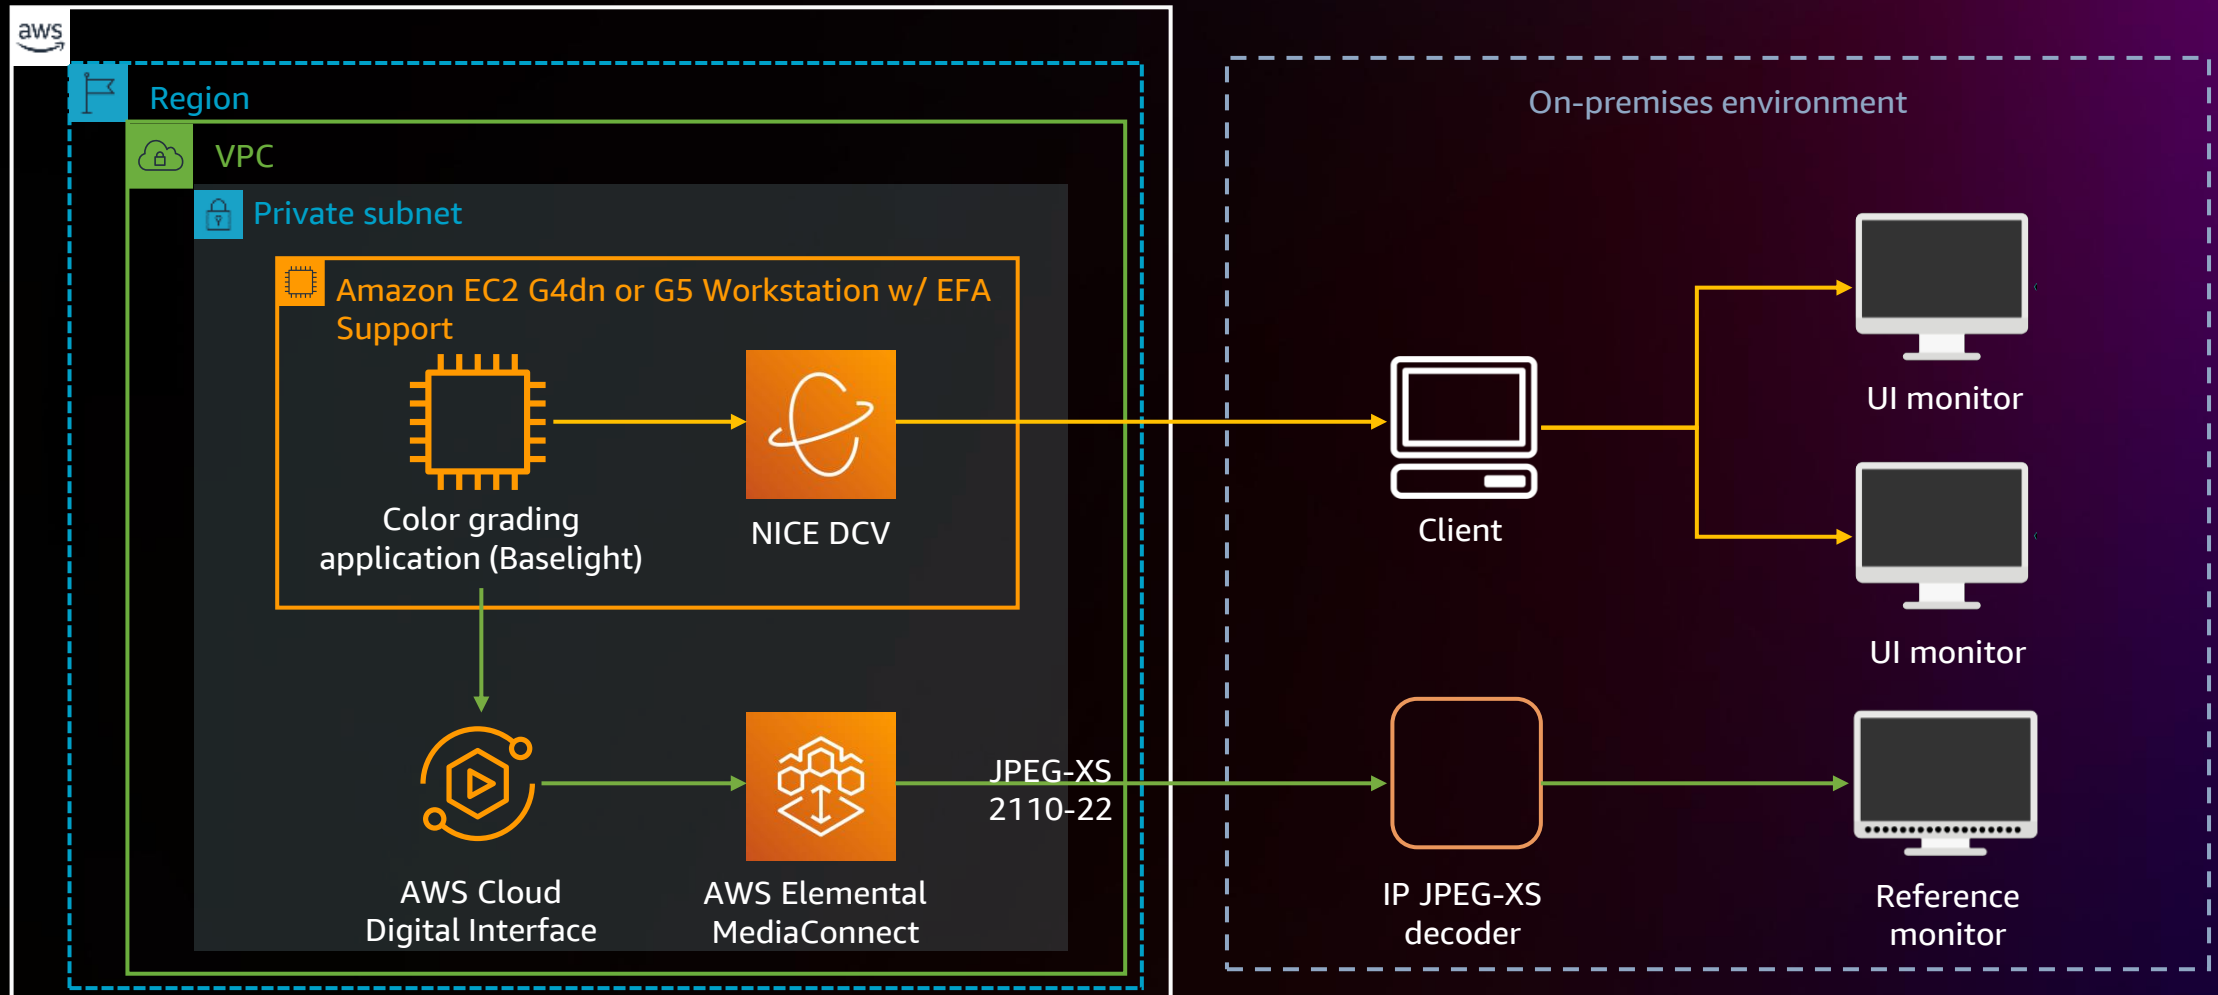

Uncompromised quality

Color in the cloud

WITH BASELIGHT

H2A WINNER
Engineering Excellence Award

The Lord of the Rings: The Rings of Power A case study on AWS

9,164 visual effects

1,500+ artists worldwide

12 global vendors

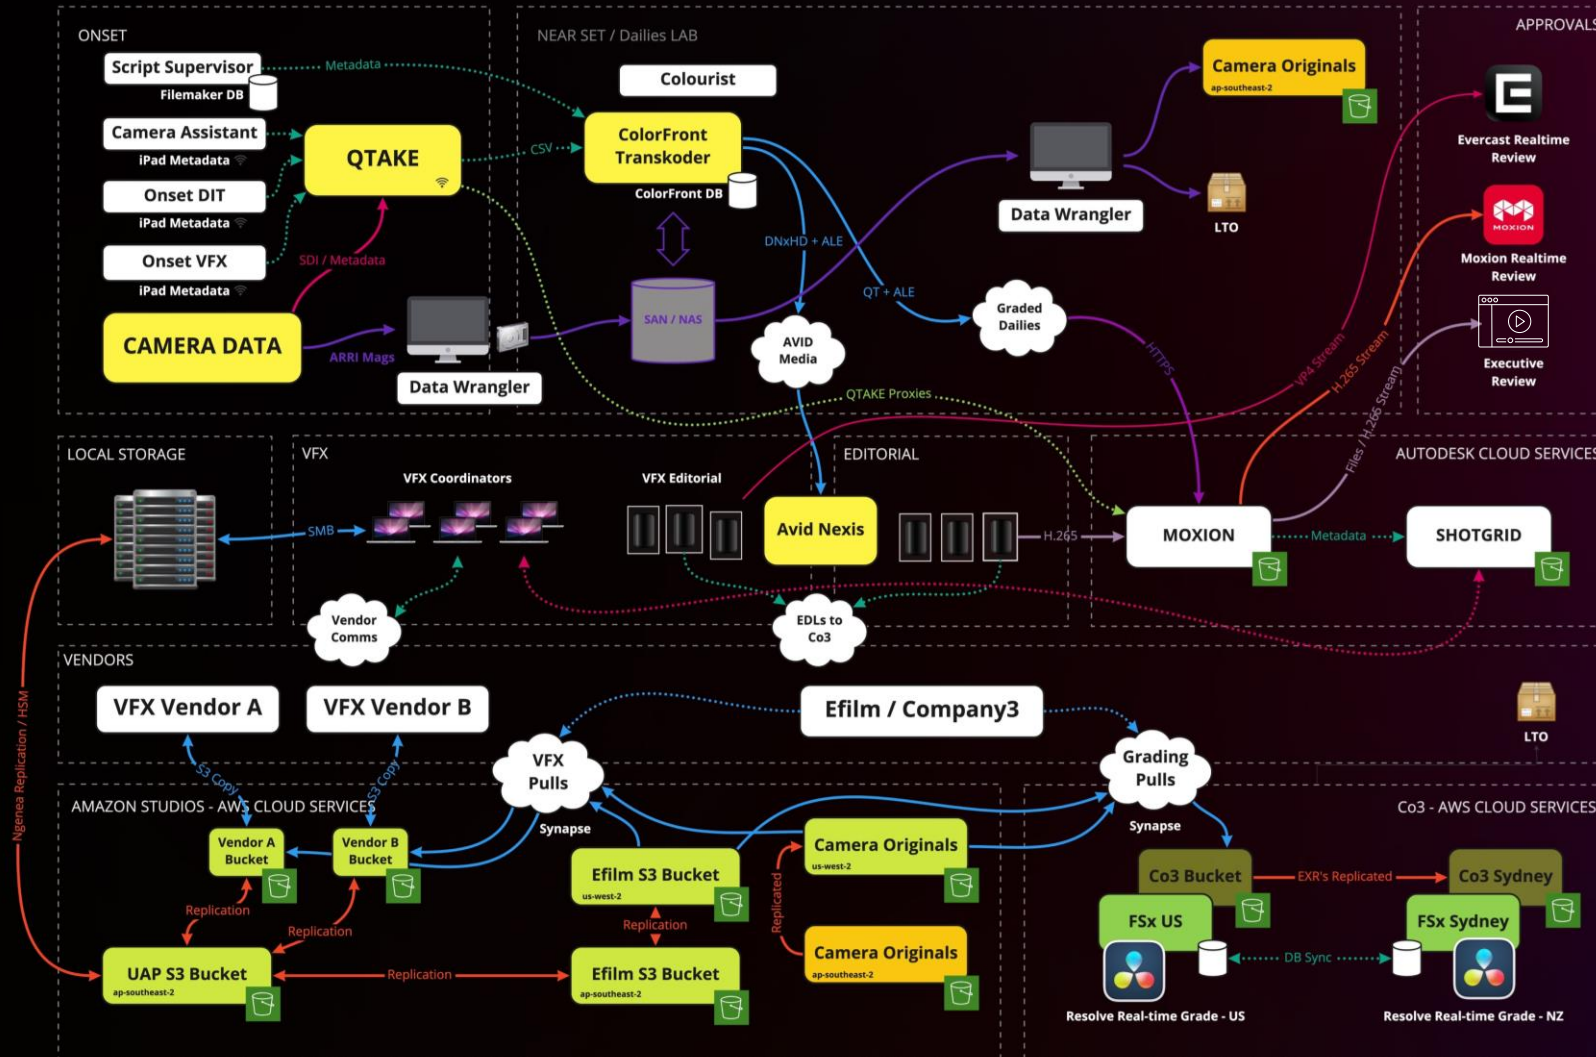

Starting with a map

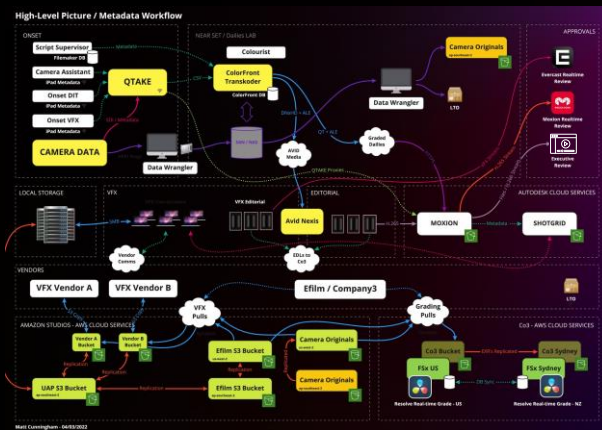

**“I wisely started with a map, and made the story fit.
The other way about lands one in confusions and impossibilities,
and in any case it is weary work to compose a map from a story.”
~ J.R.R. Tolkien**

Nonlinear production model

What is an asset?

PRODUCTION

- Concept art
- Set drawings
- Storyboards
- Location photos
- Costume
- Props

ORIGINAL MEDIA

- Camera negative
- Production audio
- On-set photography

3D FILES

- VFX models*
- ART models
- 3D set plans
- Processed LiDAR
- *shareable in USD format

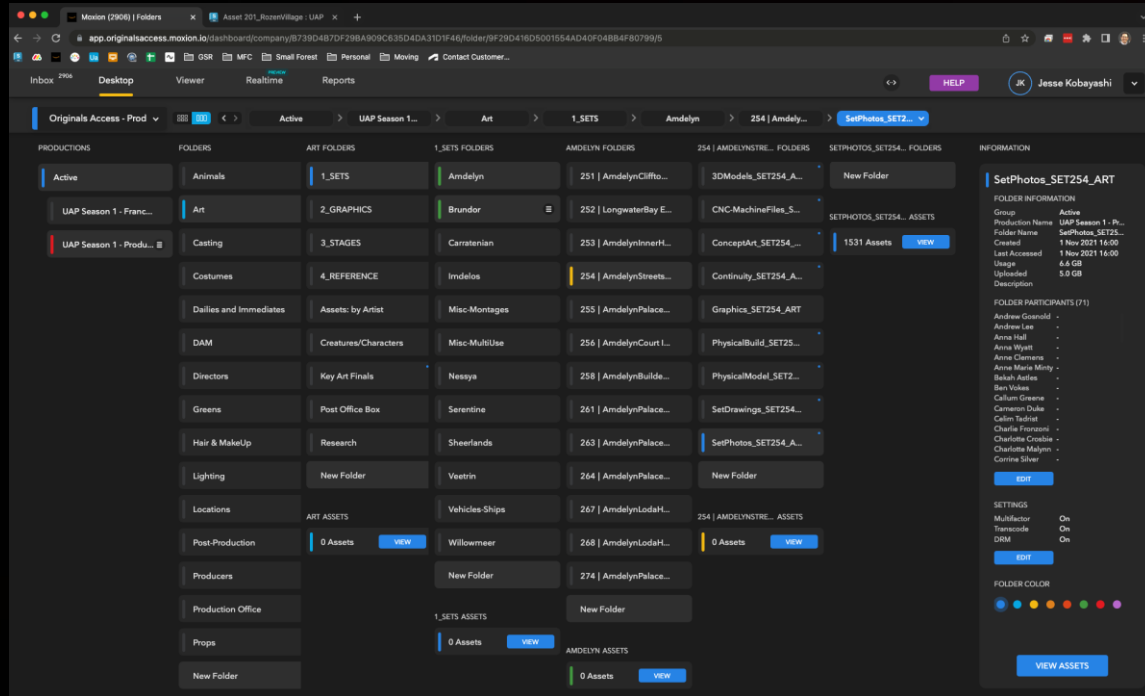

DELIVERABLES

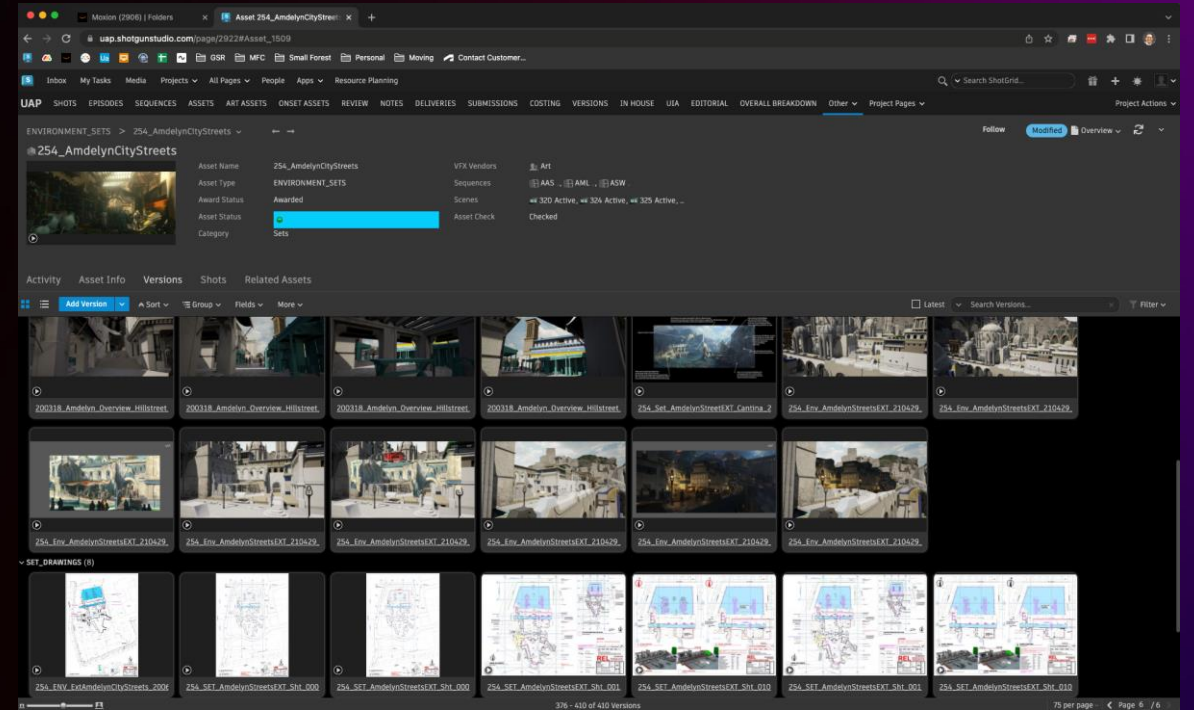

- Final audio/video files
- EXR shot finals
- Text elements
- White papers
- Wrap documentation

The above list is just an example list – in truth, nearly any file generated throughout a production lifecycle should be catalogued, tracked and stored

Asset management as workflow

Company 3: Premier artist-led creative company driven by technology and innovation

- Santa Monica, Hollywood, New York, London, Atlanta, Toronto, Vancouver, and AWS
- Specializing in all aspects of postproduction
- Feature film, episodic, documentary, and commercials

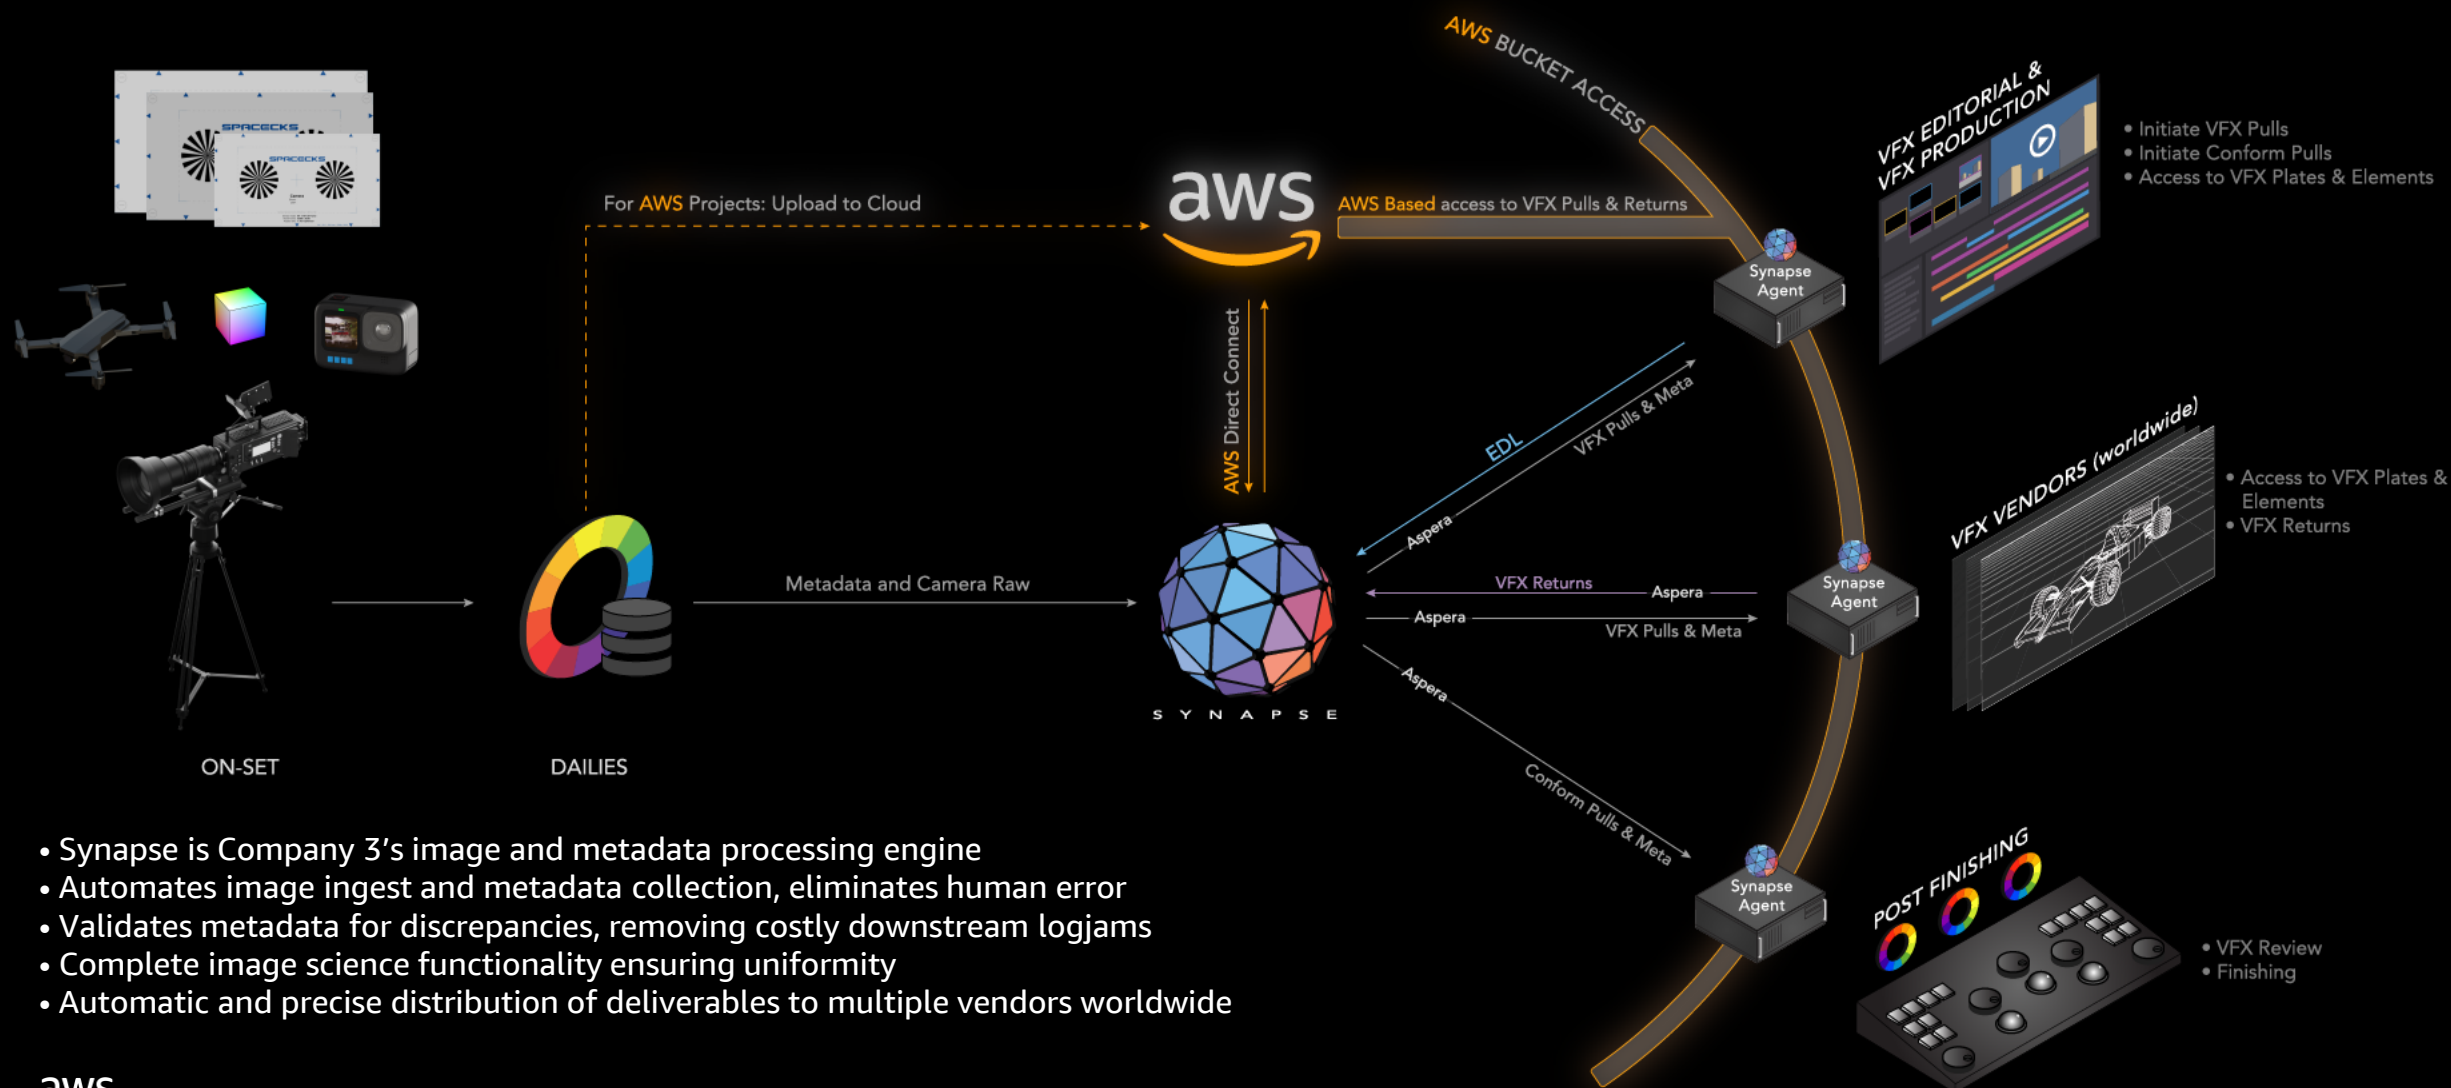

Company 3 and The Rings of Power

- AWS based post-production environment built by Company 3
- Camera raw, dailies, image science, VFX pulls and returns, conform, finishing and deliverables
- AWS Multi-region US-West, US-East, AP Southeast2, and EU West 2
- CPU, GPU, storage, networking, databases, and security
- HDR/SDR reference-quality stream distributed over AWS secured global network
- US West to Idaho, LA, NY, Auckland, and London

1

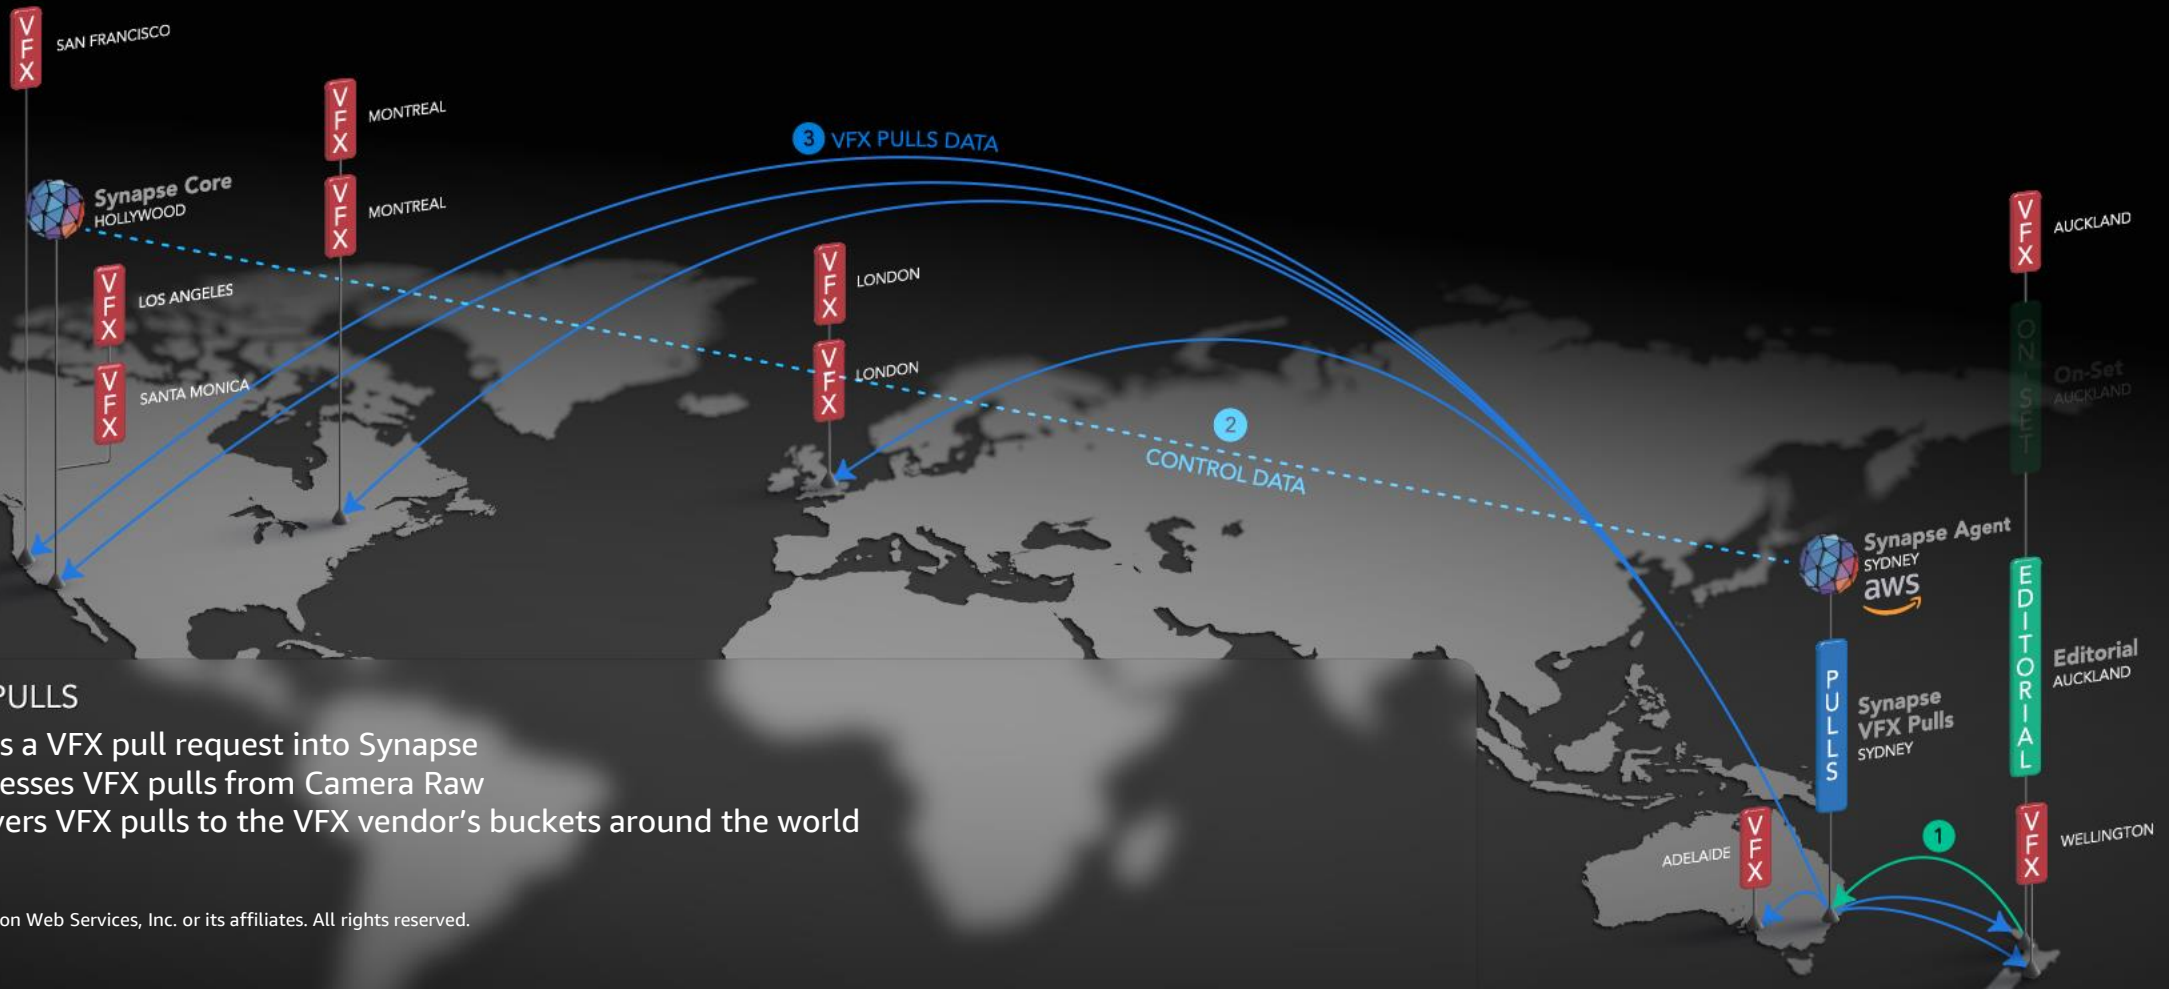

ON-SET PRODUCTION

- 68 days of content captured
- Content lives in AWS Southwest Sydney
- Hybrid initially
- In collaboration with AWS Professional Services, Synapse is fully AWS based

© 2022, Amazon Web Services, Inc. or its affiliates. All rights reserved.

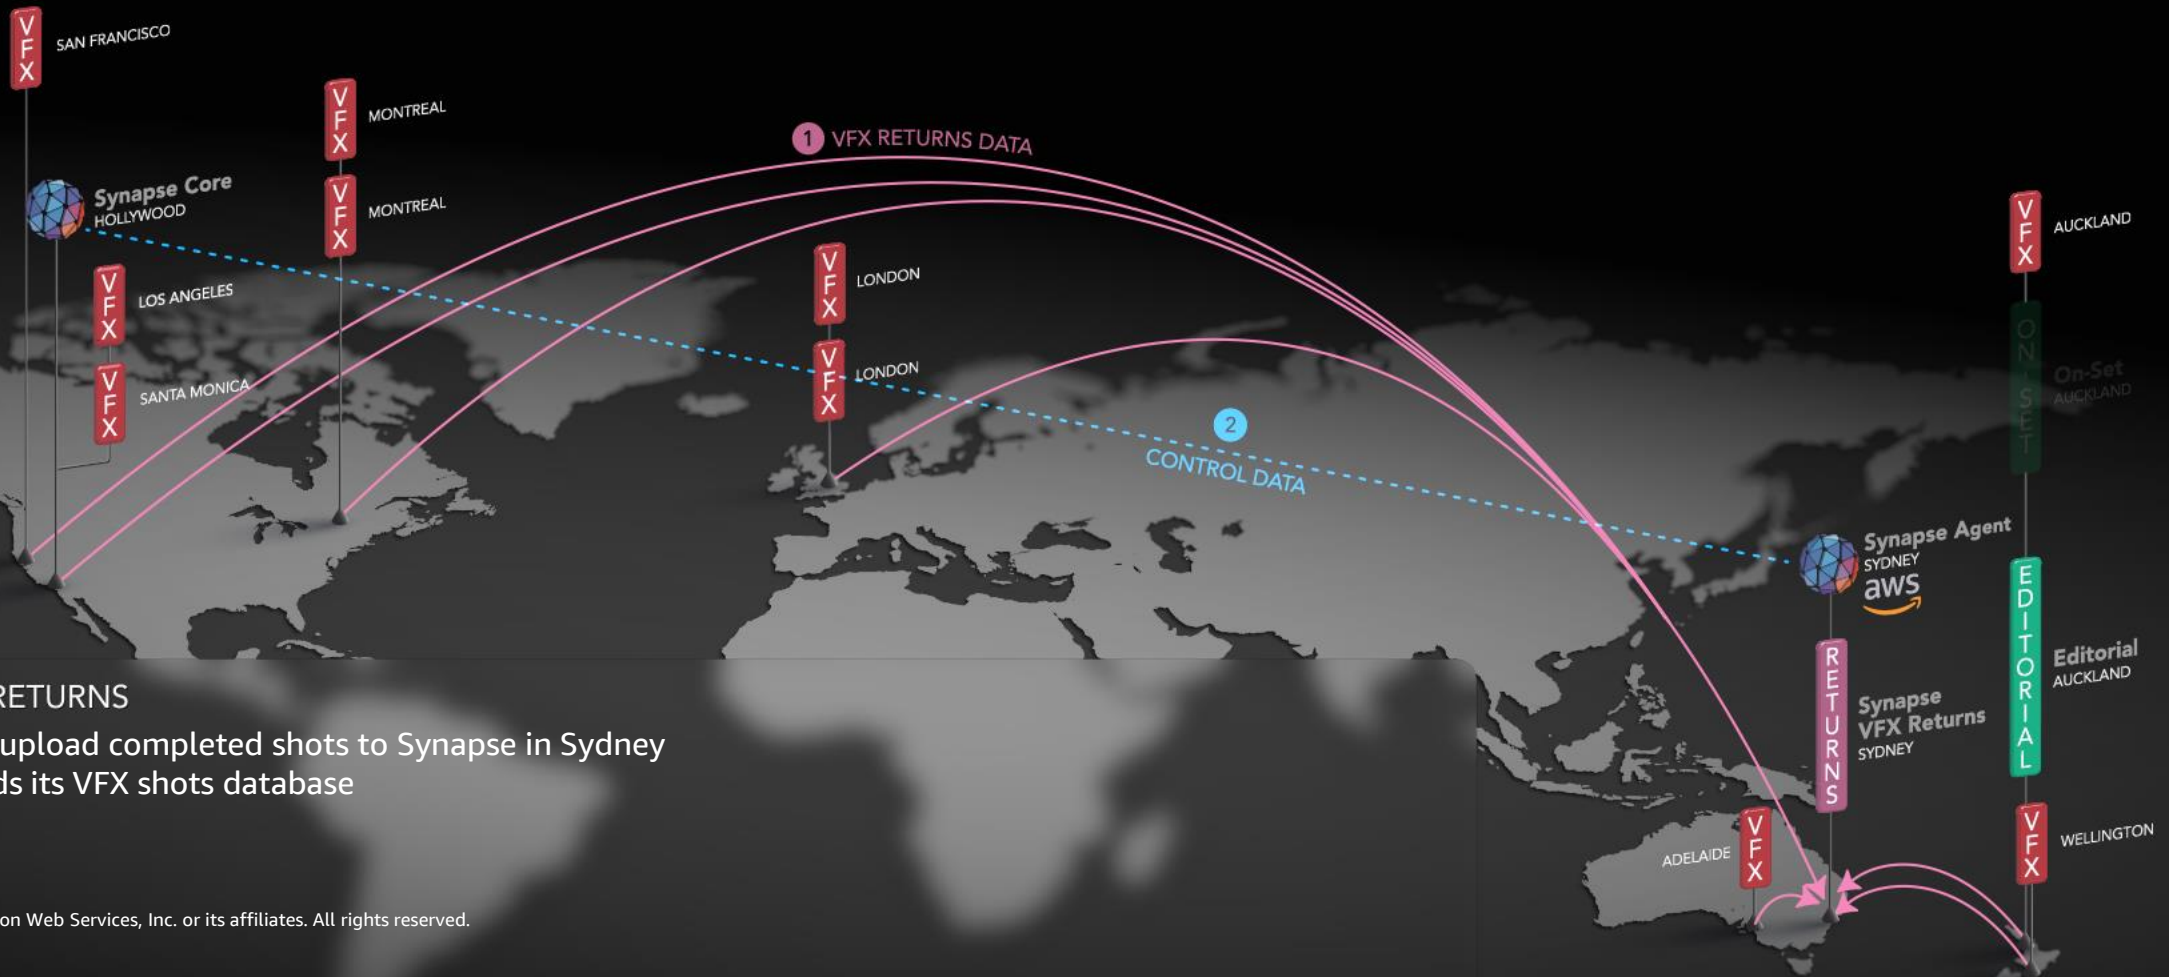

Synapse: VFX pulls

VISUAL EFFECTS PULLS

- Client submits a VFX pull request into Synapse
- Synapse processes VFX pulls from Camera Raw
- Synapse delivers VFX pulls to the VFX vendor's buckets around the world

Synapse: VFX returns

VISUAL EFFECTS RETURNS

- VFX Vendors upload completed shots to Synapse in Sydney
- Synapse builds its VFX shots database

Company 3: Cloud Studio

CONFORM & FINISHING

- Co3 Cloud Studio, a secure complete post-production environment
- Cloud Studio is 100% code based automatically builds everything needed for a secure high-performance post studio
- Synapse Co3 Cloud Studio forms and processes non-VFX shots and selective VFX shots to Co3 Cloud Studio in Sydney
- Co3 automatically synchronizes the content to all Co3 Studios in US-west-2 and EU west2
- Conform artist verifies the conform in the Co3 Cloud Studio (us-west-2)
- Finishing artist in Idaho directs global creative finishing of content
- Participants in LA, Idaho, NYC, London, Australia, and New Zealand are viewing a reference live stream from the Co3 Studio

Takeaways

- Let your imagination define your solutions
- Understand AWS tools available to build your solution
